No. 28

## BUSINESS MEN BACK UP THE COUNCIL

The council chamber was crowded yesterday afternoon till standing room was at a premium while numbers able to obtain admission in the chamber filled the committee room and the hallways of the building. The occasion was the public meeting called by Mayor Mackenzie to consider the course to be pursued by Edmonton in the light of the strenuous efforts being made elsewhere to locate the permanent capital of the Western Province, if such be formed, in a remote part of the district. The meeting was presided over by Mayor Mackenzie and was attended by almost all the business men in the city. His Worship briefly outlined the purpose of the meeting to consider the steps being taken by other points to side-track Edmonton and the Edmonton district as the meeting place of the first Legislature of the proposed new province. The meeting was addressed by many of the leading business men of the city who were unanimous in demanding that the necessary steps be taken to safeguard the interests of the city and district in this matter. The meeting throughout was most enthusiastic. The city Aldermen, who were present were assured that the business men of the city would back them up in selecting and sending a strong delegation to present our claims to the Government and in taking such other action in the matter as they deemed advisable.

THE WESTERN ATTITUDE  
TOWARD AUTONOMY.

It is but fair at the outset to say that the people of the Territories are by no means unanimously in favor of the immediate granting of provincial autonomy. True, the contrary has been stated emphatically and often by the Premier of the North West, but Mr. Haultain bases his conclusion on the fact that two years since the coalition Government of which he is the head was returned to power by a very large majority and on his own statement that the issue in that election was the autonomy question.

But those familiar with "local North West" politics know that not for many years have the electors divided in local affairs on any question of policy. Under the coalition system of Government which has existed they have had few if any opportunities for doing so. It has been the bad or good fortune of the Territories that the Opposition has not been numerically strong enough to politically vigorous enough to formulate an alternative policy, nor even to force the Government to battle for it own proposals. The personality of the candidate has been the determining factor in the local elections and the only reference made to the Government has been to commend it for a clean administration of public affairs—which has never been seriously questioned. In those constituencies in which the members of the Government were candidates the wisdom of their departmental administration may have been more or less carefully considered but no clear cut policy on autonomy or any subject of similar breadth has been made the general theme.

In the recent Dominion elections an attempt was made to secure a redistribution of the Northwest electors in favor of the immediate granting of autonomy. The Territorial Premier stamped the country in the interests of the Federal Opposition candidates on the plea that the Western Liberal members of the late parliament had not given a sufficiently energetic support to his demands for Provincial powers. His admitted purpose was to defeat those members, that he might be able to approach the Dominion Government with a demand and emphatic popular demand for the creation of Provincial institutions in the North West. The measure of the popular interest in the question even when thus aroused was best shown by the election returns when several supporters of the Federal Government were elected by unusually large majorities from the ten constituencies. Nor has it been shown that anyone of the three successful opposition members owed his election to his support for Provincial autonomy.

To contend, as has been done, that the people of the Territories are anxious for the immediate granting of this broader status, is to beg the question in the face of very strong contradictory evidence.

The attitude of the North West toward this as other questions is eminently practical that if autonomy means a betterment of our conditions it should be urged; otherwise it should be deferred. The Premier of the North West has not failed to play upon the pride of his auditors on many occasions by allusions to the "prestige" of the Provincial status. The people of the West care little for prestige. They are individually and politically concerned in the pursuit of things more tangible and more vital.

This attitude was very clearly expressed, and, perhaps in a measure determined, by the stand taken by the Territorial member of the House of Commons in the session of 1903, when the question came before Parliament for discussion. Instead of endorsing without query the request of the Territorial Premier for immediate Provincial powers, these members raised the question of the terms upon which these powers were to be granted. When the leader of the Opposition proposed referring the details of the matter to consideration from the Territorial Assembly and the Dominion Parliament, the North-West members objected to the proposal very

## Superfluous Hair

Removed by the New Principle

## De Miracle

It is better than electricity, because it does not scorch or produce a new growth. Better than X-ray, because it does not burn, scorch or paralyze the tissues under the skin. Better than depilatories, because it is not poisonous; therefore, it will not cause blood poisoning, or produce eczema, which is so common with depilatories, and does not break off the hair, thereby increasing its growth.

Electrolysis, X-ray or depilatories are offered you on the bare word of the operators and manufacturers. DE MIRACLE is not. It is the only method which is endorsed by physicians, surgeons, dermatologists, medical journals and prominent magazines.

DE MIRACLE will be mailed to any address, sealed in plain wrapper for \$1. Your money back without question if it fails to do all that is claimed for it.

Our booklet—the most complete treatise on Superfluous Hair ever published—containing the testimonials of numerous physicians and surgeons and those of hundreds of others—will be sent free, in plain, sealed envelope, upon request. Write for it to-day to DE MIRACLE CHEMICAL CO., 22 QUEEN STREET WEST, TORONTO, or THE ROBERT SIMPSON COMPANY LIMITED, TORONTO, ONT.

## ROSS BROTHERS LIMITED

ARE THE SOLE AGENTS  
IN EDMONTON FOR THEMONARCH  
RANGE...

There is no question as to what this Range can do for its durability, as thousands and thousands of them are in use on this continent and so far as we have been able to learn no fault has yet been found with them.

The main body of this Range is built up of sheet steel, and all the other parts that require to be cast are malleable iron. The top is ground to a bright steel finish, and is so heavy that, no matter how long or how hot you heat it, you cannot make it warp or get out of shape.

You will notice that the oven has a drop door, and the above cut illustrates the strength of this door, as any man can stand on it when it is open without straining it in the least. This will give some idea of the strength of the Stove, as all its parts are as strong as this cut of the oven door open with the salesman standing on it would convey to you.

It is a wonderful baker, a very quick heater, and its water front is so constructed that it will heat water nearly twice as quick and on a much less quantity of fuel than any other Range now on the market.

The purchaser of a MONARCH RANGE insures a satisfaction that cannot be measured in dollars and cents, for at the end of ten years' use it will operate as easily and be just as good as when first started.

Remember the MONARCH when you want to purchase a Range.

Ross Bros. Ltd.

### The Western Attitude towards Antimony.

Continued from page 2.

energetically on the ground that the terms were the vital consideration, and a together too important to be relegated without consideration to a committee after the change of system had been actually undertaken by the support of Mr. Borden's resolution. This stand of the Territorial members was the first challenge which had been issued to the wisdom of the movement, and marked the beginning of the really serious popular consideration of the details of the proposed bargain.

The discussion which has ensued and which was very materially encouraged by the projection of the question into the Dominion Campaign, has been very general and pretty thorough but the net result has been rather to unsettle the opinions and awaken the doubts of the electoral than to establish any clearly defined conviction, and it cannot be reasonably asserted that anything approaching an unanimous opinion, favorable or hostile to the movement, now exists. This indefinite state of public feeling among the people of the North-West should in itself be one of the points considered by the legislators, Territorial and Federal, before any further definite action is taken in the matter.

### LAND OFFICE RETURNS FOR JANUARY.

### Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

**Coal.**—Coal lands may be purchased at \$10 per acre for soft coal and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton or 2000 pounds shall be collected on the gross output.

**Quartz.**—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$750 per annum for an individual and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered minerals in place, may locate a claim 1500 by 1500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office. One additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior, to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres. The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

**Placer Mining.** Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

**Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.**—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, and where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

**Dredging in the Yukon Territory.**—At least five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

**Placer Mining in the Yukon Territory.**—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts on each end, bearing notices. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consents of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any

number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee. Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

**Hydraulic Mining.** Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent, is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and at least \$5,000 must be expended annually. The lease includes all base metals, quartz, and coal, and provides for the withdrawal of unoccupied land for agricultural and building purposes.

**Petroleum.**—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company, having machinery on the land to be prospected, an area of 400 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery in an area not exceeding 840 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of Interior, Ottawa, September, 1903.

## PROVINCIAL AUTONOMY.

### CONFERENCES SUSPENDED.

Number of Members and Constituencies in New Provinces will Probably be Fixed by the Act.

Ottawa, Feb. 4th.—Meetings between the representatives of the Dominion and Territorial governments have been temporarily suspended. Haultain is in the west and Bulleya in New York. Next week the conference will be resumed. Until the main principles for the proposed bill have been thoroughly discussed between the two parties the contemplated legislation will not be considered by the cabinet. Each member of the cabinet has his own opinions as to what ought to be done but until they meet together and talk over the situation these views will not be crystallized into draft bills. It seems tolerably certain that the new legislation will specify the number of members in each legislature and also create electoral constituencies.

The number of members will probably not exceed 25 in each case but power will be granted to increase the representation as the population grows. There will need to be a re-adjustment of Federal constituencies in the North-west so as to harmonize with the conditions brought about by provincial autonomy. In the census bill now before parliament, provision is made for taking a census in the North-west. When the heads have been counted the Federal Government will be in a position not only to readjust the constituencies but to increase representation from the Territories in the Dominion House that is deemed necessary. If the readjustments were neglected it might so happen that a Federal member would be found sitting for a constituency that would be in two provinces. This would be an unique situation. One of the first needs of the new provinces will be legislative buildings. For this purpose the Dominion will require to make substantial grants so as to help the young offsprings of confederation along in their career.

### MERCHANTS BANK SITE PURCHASED.

Negotiations have been completed for the purchase of the present site of the Massey-Harris warehouse by the Merchants Bank of Canada. The prospective sale was mentioned in the Bulletin some time since, and is now an accomplished fact. The lot is at the corner of Howard Street and Jasper Avenue, opposite the new block of the Bank of Montreal, with a 50 ft. frontage on Jasper Avenue. The price paid was \$150,000. It is expected that the foundation of a suitable block will be laid during the present summer and the building completed next year.

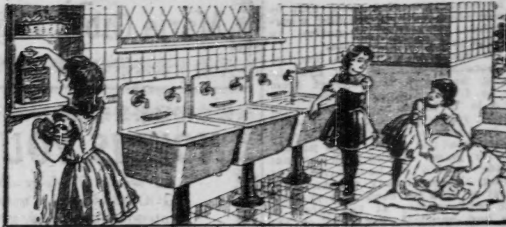

The Massey-Harris building will be removed to the lot just north of the present site, on Howard Street.

Washing is hard work under any circumstances, why should you make it harder by using poor soap?

## Sunlight Soap

cuts the work in half. It does its part of the work itself, you don't have to scrub or boil the clothes. The Sunlight way is the easy way as well as the best and least injurious to clothes and hands.

Toronto

## "CANADIAN" RUBBERS

They look as if in making them looks had been the only consideration—they wear as if nothing but wear had ever been thought of.

### ALBERTA COLLEGE LITERARY.

Alberta College Literary Society held their regular semi-monthly meeting in the assembly room of the college building last evening. The chief attraction was the mock parliament, supposed to be the first parliament of the province of Alberta meeting in the capital, Edmonton.

The third reading of a bill to unite the municipalities of Edmonton and Strathcona was debated upon, G. W. Glover, leader of the government, introduced the bill. C. M. Tait led the opposition and Percy Hook the independent party. A large number of members, including ladies were present and the several debaters who spoke did remarkably well. After some stormy discussion the bill was voted on and passed. Prof. Fletcher occupied the speakers' chair. H. McDonald, the clerk, table and a couple of pages added to the impressiveness of the scene.

Another feature of the evening was the first appearance of the College Glee Club, which gave the opening item in the programme. The Glee Club is a credit to the college.

An instrumental by Miss Baltrick and a solo by Miss Webster were also much appreciated.

A large number of visitors were present and the evening was the most successful yet held.

### CHURCH SERVICES.

Services as usual in All Saints church tomorrow.

"The New Crusade" is the subject of an address to be delivered in the Baptist church by the Rev. J. N. Robertson on Sunday evening. This new movement has attracted much attention and is a credit to the church. It has been briefly explained as the manual training principle applied to Christianity. Mr. Robertson is the organizer.

Services will be conducted in the Methodist church tomorrow morning and evening, conducted by Rev. Lincoln. In the morning the Sacrament of the Lord's Supper will be administered. In the evening the hymn "The Bible and the Cross" will be sung.

In Kinsmen assembly—Meeting at church the morning will be given up to a family prayer service. In the evening the pastor, Rev. John Davidson, will preach.

## H.B.K. BRAND BIG SHIRT

Made big enough for a big man to work in with comfort. Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 39 1/2 to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wristbands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 39 1/2 to 42 yards of material per dozen.

Sold at all dealers but only with this brand—

## THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy, as far as civilization and development goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fall utterly were it not for the presence and the skillful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point; the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this, the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forerunner of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "Can iron be practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand? Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to certain countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Undimmed by the fog and mists of uncertainty, she looks up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her dowry is an ample one, nor does she withhold it from those who have the wisdom to know her claims. Her veins are of fine gold. Her ornaments are many and precious. Her will is of iron, and as surely her will controls her actions, so surely will her iron can be used to build the great trunk and the Canadian Northern, albeit in themselves a vast undertaking being but an earnest of the future and of still greater enterprises. She must have also bridges, ships, machinery and the thousand and one other necessities which go to build up a large nation—which she will surely one day become. That, to build this, to build a nation, is a stupendous meaning which this implies and ask yourself the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our garden, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we have ready to our hand, in other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them, let us indiscriminately throw away money, but with careful cultivation and with due regard to the future, and the probable measure of success which such action promises.

There are those who would say that the average percentage of iron mines with a large output is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, deny any form of mining, who in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in building up his country by studying its natural resources and assisting to develop them?

It almost devolves upon us as a duty, which we owe to our children, and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in this direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testimonials exacted from us by nature before she will yield up her stores in trust for future generations. Taking the iron belts of this continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our arm pit and run across it again at our wrist we may safely conclude that it is the same artery, or lead us it would be termed in mining parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch out a geographical chart of all the iron districts and leads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations where carried out on the basis above illustrated. We refer to the world famed iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular claim is that of a gentleman who now rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$30,000. After inspecting the timber he offered to sell his property for less than he had paid for it, but before he could do so some two years after he discovered that the iron ore ideas exposed on his land were valuable, and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$8,000,000.00. His income from this source alone is \$750,000 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blakemore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposits that the springs come from a strata of ore body below which could be disclosed by boring."

Alluding to a proposed expenditure of \$10,000,000 he adds "Having had thirty years experience in locating and working various iron deposits, I have no hesitation in saying that this is available property and one which will justify the expenditure recommended."

The mineral deposits he finds by analysis consists of 45.2 per cent. of metallic iron from surface ore and as he further states, not only could it be used to produce an excellent steel, but for which a market could be used in combination with other ores or smelting and iron and steel manufacture, similar to that so successfully smelted by the Badger success, Quebec province for many years.

Small wonder then that the valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

A morning glass of

This is the time to buy

### MEN'S FUR COATS

We have them from \$18.00 up, and have the greatest snaps in Coon Coats ever offered in Edmonton.

### RADICAL REDUCTIONS

Have been made in every Department, and you will find hundreds of Bargains in our large stock.

### In our GROCERY DEPARTMENT

We have as usual all the good things that our patrons demand. A visit to this Department will show you that it is the most up-to-date Grocery Store in the city.

### Our HARDWARE STOCK

Is without doubt the best in Alberta, and we will be glad to show you that our prices are right and that we can save you money on all your purchases.

Yours for business,

REVILLON BROTHERS, LIMITED.

## We Paid \$100,000

For Ligozone, Yet We Give You a 50c. Bottle Free.

We paid \$100,000 for the American rights to Ligozone; the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two years, through physicians and hospitals, in this country and others. We cured all kinds of germ diseases with it—thousands of the most difficult cases obtainable. We proved that in germ troubles it always accomplishes what medicine cannot do. Now we ask you to try it—try it at our expense. What if we did; see what it does. Then you will use it always, as we do, and as millions of others do. You will use it, not only to get well, but to keep well. And it will save nearly all of your sickness.

### Kills Inside Germs.

Ligozone is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill.

The reason is that germs are vegetables; and Ligozone—like an excess of oxygen—is deadly to vegetal matter.

There lies the great value of Ligozone. It is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact that gives Ligozone its worth to humanity. And that worth is so great that we have spent over one million dollars to supply the first bottle free to each sick one we learned of.

### Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Ligozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

### 50c. Bottle Free.

If you need Ligozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Ligozone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Ligozone costs 50c. and \$1.

### CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Ligozone Company, 128-134, Wabash Ave., Chicago.

My disease is.....  
I have never tried Ligozone, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.

Any physician or hospital not using Ligozone will be gladly supplied for a test.

Sold on Merit

At all high-grade grocers

### DAILY SUBSCRIBERS

Will confer a favor by notifying the Office by phone or otherwise of any failure to deliver, so that explanation can be made and future failure guaranteed against.

## EDMONTON ALTA. CANADA

POPULATION, 7,500

## CITY GOVERNMENT:—

Mayor, K. W. MacKenzie; Aldermen, C. May, K. A. McLeod, W. H. Clark, D. R. Fraser, J. R. Boyle, T. Bellamy, J. H. Picard, W. A. Griesbach.

Conveniences:—Waterworks, sewer systems, telephone system, electric lighting system, all owned and operated by the city.

Board of Trade:—President, J. H. Morris, Secretary, F. E. Tims.

Immigration Officer:—C. W. Sutter.

Educational Institutions:—Public and separate schools, high school, Alberta College.

CHURCHES:—Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 16.50.

## LOCAL

—Train one hour and 15 minutes late.

—No. 3 of the High School Topics has made its appearance.

—Rev. Father Leduc O. M. T. left for Ottawa yesterday.

—The ladies of St. Joachim's Church intend holding their monthly social next week.

—The U. P. R. are building a large freight platform on the east side of the track in Strathcona.

—Owing to a hitch in negotiations for one of the risks the date of the first junior hockey match for the hockey cup has not been fixed.

—At a meeting of the fire brigade on Thursday evening J. A. Wilson was elected chief and H. W. Heathcote re-elected secretary-treasurer.

—The Knights and Ladies of the Macdonalds will give a grand Masquerade Ball on St. Valentine's day February 14th at Robertson's Hall.

—The city council met yesterday and chose Mayor McKenzie, President Morris of the board of trade and C. W. Cross delegates to represent the city interests at Ottawa.

—Word has been received that the new C.N.R. coach being brought in for the T.E.Y. and P. service was damaged in a wreck near McGregor and taken back to Winnipeg for repairs.

—A private letter received by Frank Oliver, M. P. from Hon. Clifford Sifton, Minister of Interior, who is at present in a Sanatorium in New York, states that Mr. Sifton will arrive in Ottawa about Feb. 10 when Provincial Autonomy will be discussed. Mr. Oliver left for Ottawa on Friday.

—Speaking of H. L. Williams of the L. K. Oil Co. the Advance Courier of Summerville, California, says: "Those who know B. L. Williams of oil, when he operated in the field and did go much towards developing the territory here, will feel satisfied that the people interested in the new field will get a run for their money; and that the country will be thoroughly prospected if Harry Williams is in charge."

## PERSONAL

G. D. McMorris went south today.

Wm Revell left today for New York.

Prof. Biddell went down to Montreal today.

E. Oliver, M.P., left on Friday morning for Ottawa.

C. W. Cross, M. P. and his wife left for the east this morning.

W. Short, manager for Revillon Bros. left this morning for New York.

Miss O'Brien of Welland is visiting Mrs. Wetbridge. Several Hayden Brothers, contractors of Fort Saskatchewan, are at the Imperial.

Father Leduc left yesterday for Montreal to meet Bishop Lacombe who is on his way back from Rome. The Masses of St. Patrick's of Prince La Prairie arrived on Thursday evening and are the guests of Mrs. W. T. Robertson.

Mr. P. Jory of the Bank of Commerce has been transferred to Calgary. Mr. Miller of Imperial succeeds Mr. Jory in the Edmonton branch.

Mr. H. Jaffray, of the Imperial Bank, Strathcona, has been transferred to Revell's, B. C. He left on Friday morning for the west.

## PERISHED FROM COLD

## ON THE TRAIL TO MORINVILLE

Constable Returns from Investigating the Cause of the Death of a Freighter.

Constable Davis of the N.W.P.M. returned last evening from Morinville, where he went to investigate the circumstances surrounding the death of Joseph Geaudion, who was reported in yesterday's Bulletin as found in a dying condition on the trail between St. Albert and Morinville.

The circumstances did not appear to call for an inquest, and none was held.

It appears, a party of six, of whom young Geaudion was one, were hauling six loads of freight from the city to Morinville. The teams were all strung out along the trail, Geaudion being the last, and when within about three miles of their destination, Geaudion apparently fell from his sleigh to the road, unmissed by his companions on the sleighs ahead. When the party reached Morinville and Geaudion failed to put in an appearance a search was instituted, and the body of the unfortunate man was found about two hours later frozen stiff. It was lying apparently in the place where he had fallen. The body was taken to Morinville, where the burial will take place.

Deceased was an unmarried man, thirty-two years of age, and came here from Montreal some time since. He was in the employ of Mr. Jas. Perras.

Deceased is said to have attended the hockey match in Strathcona the previous evening, and the party left the city for Morinville about midnight. It is reported that the party had been drinking more or less, and the supposition is, that when the unfortunate man fell from his load he lay in a stupified condition until he perished.
